

SCHOOL QUIZ

Materials: One copy of the worksheet per group and one copy of the worksheet with the answers, for the teacher

To prepare for the class, you will need to find out the answers to the questions on the worksheet in advance.

Arrange Ss into groups of three (or groups of four if you have a large class) and distribute one copy of the worksheet to each group. Ask the Ss to complete the title of the quiz with your school's name and to think of a name for their team. Write the team names in a list on the board. Review the functional language for expressing uncertainty from unit 9.3. Give Ss enough time to work together to answer the questions, using the functional language in their discussions. Tell Ss not to look at the other groups' answers.

When they have finished, go through each question and elicit an answer from each group. Award a point for each correct answer and write the scores up on the board. If none of the answers are correct, award a point to the group that is the closest. Add the points up to find the winning team.
